Subject: RE: b/18/0528 CD1- TOOT LANE

Hi Trevor,

I've finally got a decision on the EV charger points.

I've suggested the Rolec WallPod EVWP0020 for the charging points to each plot.

Also, we're having brick supply issues across the business at present so need to alter some of the scheduled bricks. To aid supply, I'm suggesting the elevation treatments are changed to our Rural types instead of the Urban type specified, with the housetype 403 attached as an example.

The attached plan should be self explanatory but let me know if you need any more information.

Regards

Matthew Bridges
