Subject: RE: Planning Application B/22/0132 - 27/29 West street, Boston

Good afternoon Emma,

Thank you for your email dated 01/04/2022 .

We have contacted our client and can confirm the LED lights will only be attached to the apex of the canopy frame, not running along every spar of the canopy roof and will be directed straight down. The LED lights will also be static and not flashing.

I hope this clarifies the matter and please do not hesitate to contact me if further information is required.

Kind Regards,
Selcuk Baskan

Subject: Planning Application B/22/0132 - 27/29 West street, Boston
Importance: High

Good morning,

I am the case officer for this planning application. Environmental Health have commented on what you are proposing and need the following issues clarifying;

- Looking at the plans it appears that the LED lights will only be attached to the apex of the canopy frame, not running along every spar of the canopy roof. Can the applicant please confirm that this will be the case and as such that the lights will be directed straight down.
- Will the LED lights be fixed or flashing?

Once this information has been received I will pass it on to the Environmental Health team.

Kind regards

Emma Dennis | Planner | **Boston Borough Council**
