compliant

The GlenFarrow Biomass Boiler Range

Delivering outstanding RHI success

Our industry-leading batch fed Biomass Boiler burns wood and straw to provide heat for many applications, reducing your fuel costs and increasing your income.

The GlenFarrow Biomass Boiler Package

We offer our range of Biomass Boilers as a complete system, fully installed by our expert team. This ensures all the work is carried out to GlenFarrow's exact specification and that it's all covered by our comprehensive 3 Year warranty, with your first service free.

We offer free site surveys to calculate the feasibility of the project, designing a bespoke solution for your exact heating requirements. Existing heating systems can work in conjunction with the our Biomass Boilers, allowing you to transfer to biomass at the flick of a switch.

Every part of the process is taken care of by the GlenFarrow team, making the installation of your heating system as easy as possible from initial enquiry to final commissioning. Even the RHI application and BSL/FMS application(s) are prepared and submitted.

Applications & Uses

- Wood Drying
- Farmhouses
- Glasshouses
- Milking Parlours
- District Heating Systems
- Multiple Linked Buildings
- Swimming Pools
- Factories
- Grain Drying
- and many more

Service & Guarantee

- 3 Year Guarantee on Boiler
- 3 Year Guarantee on Installation
- First Service free
- RHI and application service*
- BSL and FMS service**

Robust and Reliable

Designed and manufactured by GlenFarrow in the UK, the boiler is of the highest quality and is fabricated from 8mm Boiler Plate to ensure durability and long life.

Over 800 successful
RHI applications

Renewable Heat Incentive (RHI)

Biomass boilers fuelled by wood and/or straw are a great way of moving away from burning fossil fuels. To encourage you to move to biomass as a fuel, the government RHI scheme makes payments directly to you, calculated on your eligible heat used.

Our Biomass Boilers qualify for the generous medium scale, non-domestic RHI biomass tariff, with government payments guaranteed for 20 years.

Outstanding RHI Success!

All applications for RHI support are checked by Ofgem so, for prompt enrolment, it's crucial to get the process right.

GlenFarrow has great experience in the administration of the scheme; we've worked with Ofgem from the start of the scheme and have over 800 successful RHI applications. We'll help ensure your installation meets all eligibility requirements, deal with the paperwork and answer Ofgem's queries.

RHI Management Assistance

The GlenFarrow team also offers continued help with the paperwork and administration of the RHI scheme after your RHI application is accepted. We can advise when meter readings are due, file quarterly reports and complete annual declarations on your behalf, leaving you to get on with your business. We also assist with any audit conducted by Ofgem.

Latest developments!

GlenFarrow is proud to present the latest Biomass Boiler in our range, the GF295. This larger model offers increased peak output capacity along with enhanced flexibility in batch-fed fuelling.

Cereal crop straw (square and round bales) can now be used as a fuel in both our GF210 and GF295 Biomass Boilers.

About GlenFarrow

With over forty years' experience, GlenFarrow has developed a reputation for prompt, reliable service.

Our expertise covers five core areas:

- Biomass Boilers
- Commercial Plumbing and Heating
- Electrical
- Irrigation
- Waste Water Treatment

Our skilled staff can undertake major installations, refits or small upgrades, as well as contract servicing and emergency breakdown call out. We also offer full trade counter support across all core areas.

Emissions, Planning and Legislation

GlenFarrow Biomass Boilers are not approved for UK smoke control areas. It is always the customer's responsibility to check for planning regulations, requirements and any other relevant legislation.

All information correct at time of printing (June 2017). GlenFarrow UK Ltd disclaims any liability incurred with the use of this data and data provided by The Office of Gas and Electricity Markets (Ofgem) and The Department of Energy and Climate Change (DECC). Boiler peak output (calculated as per Ofgem guidance) and the actual operating output will vary due to the nature of batch-fed boilers. GlenFarrow UK Ltd reserve the right to alter any details of design and performance of products without notice.
