

Air Quality Statement

In support of Full Planning Application. HMP North Sea Camp – New Learning Building with associated exterior access ramp and Emergency generator compound with LPG tank and security fence

Exiting site

Prospective exercise yard within the existing perimeter of the prison.

Proposal

Omitting proposed external fences, security fences and external exercise yard

New Modular Building to provide Learning space for prisoners within the existing Category D prison establishment when required.

New generator and LPG tank compound.

The new proposal does not require any increase in staff numbers nor provides any additional operational capacity in the prison.

The proposal will not generate any additional vehicular traffic to or from the site.

Conclusion

We do not consider the new development will result on a detriment or adverse effect to the air quality of the site.
