

Air Quality Assessment

Proposed new house and associated works, at Sunnyside, Amber Hill Boston PE20 3RQ

Introduction

The proposed new development is not in an area of Air Quality Management.

Proposals

Our development comprises of a single house and associated works. All will be built to current Building Regulations Standards. Recent changes to NO_x emissions took place in September 2018. All our proposed boilers will be compliant to these standards.

Landscaping to the scheme is also provided to assist absorbing any possible pollutants.

Construction

Details on this can be covered by any Planning Condition.

Method statements can be provided at that stage.
