DION'S WOOD

Design and Access Statement

This arable land will become a mosaic of woodland (all native trees and shrubs) and wildflower glades and meadows. A small lake with an island (to allow birds safe nesting sites) and a mound (low hill!) will also be created.

The entire area will be provided with 3 metre wide tracks of limestone with gravel finish – total length about 3 kms. Each side of these tracks will be wildflower glades to encourage insects, including butterflies. The tracks will allow access for the delivery of mulch by contractors which volunteers will use to mulch every tree (anticipated around 15000 trees and shrubs.) In years to come they will allow removal of thinnings and eventually removal of some trees for quality timber.

Access There are three access points to the site:-

1. Willoughby Road – includes a small car park for volunteers and visitors.

2. Sibsey Road – existing farm track.

3. Rowan Way

There will be barriers to prevent unauthorised vehicular access plus open pedestrian access.

We believe this facility will help with the recovery of a very depleted natural environment and offer a peaceful haven for nearby inhabitants.
