

COMMERCIAL FLAGPOLE INTERNAL HALYARD

PRODUCT OVERVIEW

Manufactured in the UK, with a stylish tapered design and available in lengths from 6 to 12 metres, our flagpoles are regarded by architects and engineers as the very best in the UK.

Heavy duty as standard, with extra heavy duty and ultra heavy duty options available, all flagpoles are manufactured in our UK facilities and are able to withstand winds of up to 100mph unflagged.

Extra heavy duty poles are advised for windy locations whereas ultra heavy duty poles are advised for coastal towns. The windier the location, the thicker the pole needs to be.

Each commercial flagpole comes complete with a gold onion finial, hinge base plate, looped weight and a 10 year guarantee to give you that further piece of mind.

Our anti-vandal roping system is ideal for flagpoles in more public areas. The halyard is tucked away inside the pole and accessed through your choice of a lockable metal or plastic door.
