**Your selected location is in flood zone 3, an area with a high probability of flooding.**

### This means:

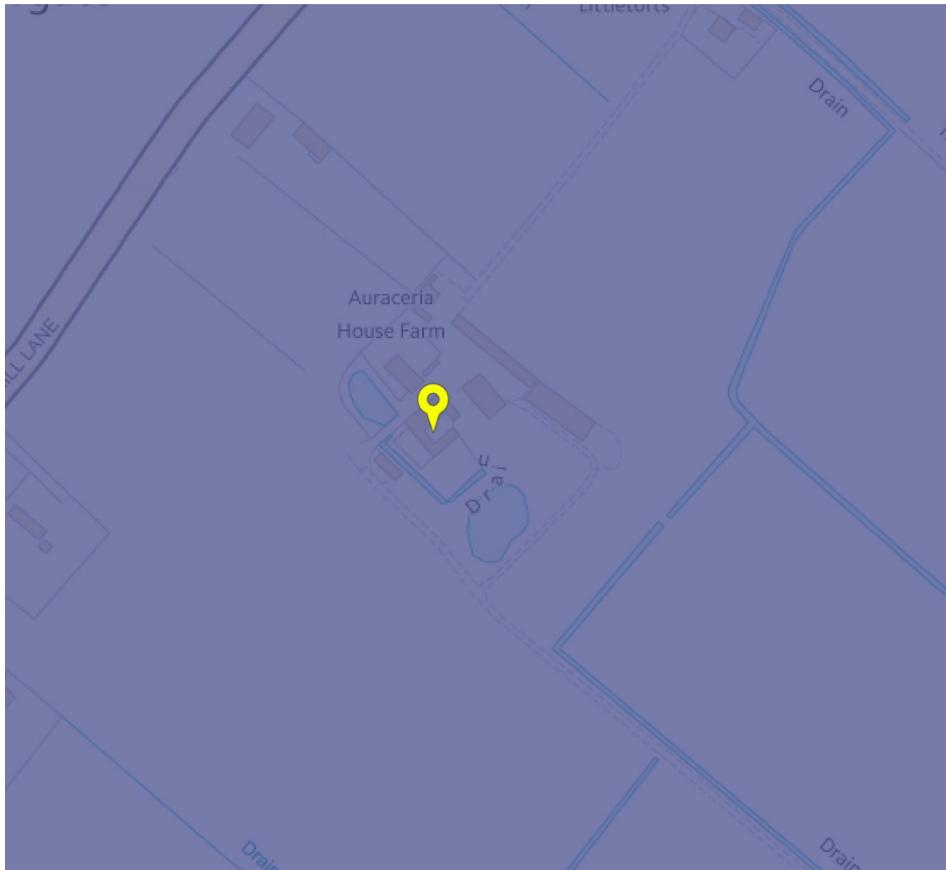

- you must complete a flood risk assessment for development in this area
- you should follow the Environment Agency's standing advice for carrying out a flood risk assessment (see [www.gov.uk/guidance/flood-risk-assessment-standing-advice](http://www.gov.uk/guidance/flood-risk-assessment-standing-advice))

### Notes

The flood map for planning shows river and sea flooding data only. It doesn't include other sources of flooding. It is for use in development planning and flood risk assessments.

This information relates to the selected location and is not specific to any property within it. The map is updated regularly and is correct at the time of printing.

The Open Government Licence sets out the terms and conditions for using government data.

## 2.0 Conclusion

The property is in Flood Zone 3, an area with a high probability of flooding

The property will be registered for flood warnings

The proposal does not affect sleeping accommodation

The proposed floor levels will be no lower than the existing floor levels.

The proposal does not increase the flood risk on the site or elsewhere
