

Do not scale this drawing. If in any doubt ask.

All setting out is to be checked on site prior to any works commencing. Any discrepancies are to be reported to millward immediately.

The specification in all respects shall be in accordance with the current "Lincolnshire Development Road and Sustainable Drainage Design Guide" and "Development Road and Sustainable Drainage Specification and Construction" publications in force in the county at the time of construction

In addition, ensure that the first section of any side road fall away from the road to which it is connecting. If general topography requires it to rise, the change in direction should take place after the first set of gullies. This is to ensure a 'false channel' with associated drainage problems is not created in the bellmouth of junctions.

All signs and line marking are to be agreed with the Senior Highways Officer prior to construction.
