## **HERITAGE IMPACT ASSESSMENT**

PROPOSED EXTENSION & ALTERATIONS TO  
EXISTING DWELLING  
GLEBE COTTAGE ONE WAY STREET SUTTERTON

FOR

**MR & MRS Q MOLLER**

## Introduction and the site: -

Glebe Cottage stands in the centre of Sutterton to the north of (adjacent to) St. Mary's Church and to the east of Bell Mere Pool Nature Reserve.

Sutterton is both a village and a parish in the south of Lincolnshire, on the old road between Spalding and Boston. The parish is about 6 miles south of Boston near the junction of the A16 and A17 Roads and on the B1397 (formerly A16). The village of Kirton lies 2 miles (3 km) to the north-west. The Spalding bypass opened as the 'Spalding-Sutterton Improvement' in 1995.. Wigtoft parish is to the west, with Algarkirk parish to the east. The parish includes the hamlets of *Struggs Hill* and *Dow Dyke*.

Sutterton has a post office and general store, one public house and restaurant, a fish-and-chip shop, a garden centre, a veterinary practice, a doctors' practice and a village hall used in conjunction with the primary school. Close to the east is Algarkirk, with which Sutterton shares Sutterton Fourfields Primary School. Before 1970 the two villages also shared the Algarkirk and Sutterton railway station on the Spalding to Boston line, now next to the A16.

**Important buildings are as follows: -**

TF 23 NE SUTTERTON STATION ROAD

(east side)

8/66 Church of St. Mary

26.1.67

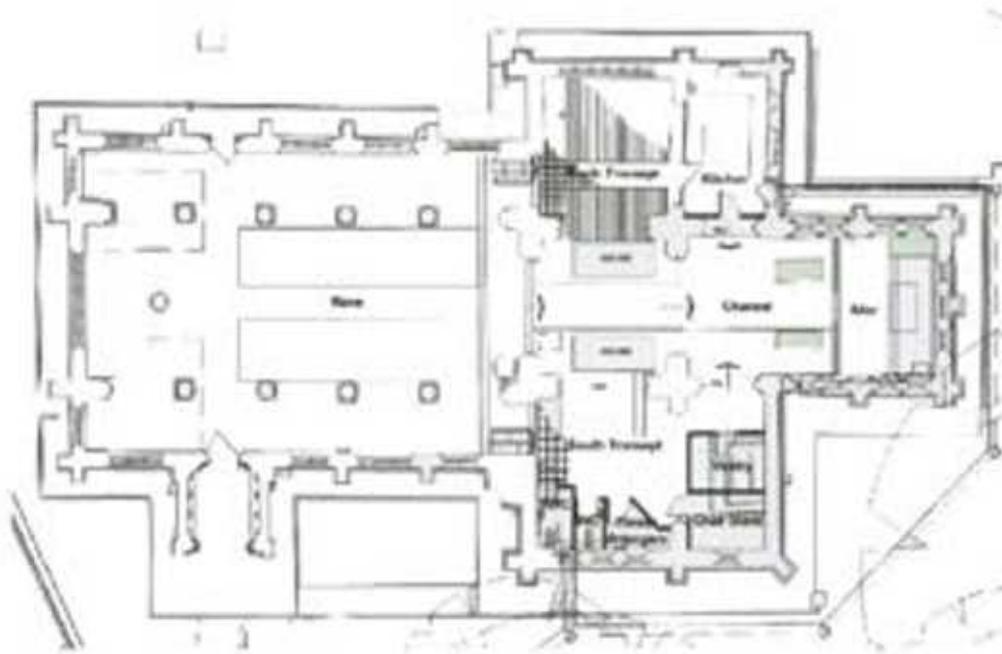

G.V. I

Parish church. Late C12, C13, late C13, C14, C15, 1602, 1787  
spire rebuilt, and tower, spire, aisles and south transept  
remodelled by Edward Browning 1861-3. Squared limestone rubble,  
ashlar, slate and lead roofs. Crossing tower, nave with  
clerestory, aisles, transepts, chancel. 5 light west window with  
segmental head and outlandish reticulated tracery. In the gable  
parapet above the date 1602 and initials BW and WF. The west end  
of the aisles have 3 light late C13 intersecting traceried  
windows. North aisle with plain parapet has 4 three light C14  
reticulated windows with rectangular surrounds. Late C12 doorway  
with shafted reveals, roll moulding, chevrons and interlaced  
hood. 5 two light C14 clerestory windows. North transept has  
large 6 light C15 panel traceried north window. 2 paired C13  
clerestory lights, chamfered with engaged shafts. Late C13 plate  
traceried 2 light window to eastern chapel. Ashlar crossing  
tower with clasping buttresses, embattled parapet, set back  
spire, richly crocketed with 3 tiers of alternating lucarnes. In  
the belfry stage are large 2 light C19 reticulated openings. On  
the transept east side a matching clerestory and to the chapel a  
lancet and a triple plate traceried C13 window. Chancel north  
wall has 2 pairs of reset C13 lancets with engaged shafts. C19  
stepped lancets to east wall. The south chancel wall matches the  
north with a single chamfered door. South transept and chapel  
rebuilt C19 with 4 lancets and sexfoil window. In the south  
aisle wall are recut C14 2 and 3 light windows with reticulated  
tracery. C19 south porch with Romanesque style outer arch,  
clustered shafts and moulded head. Clerestory matches north and  
has dated rainwater heads of 1789. Inner south doorway is late  
C12 with triple shafted reveals, foliate capitals, 2 orders of  
delicate roll moulding, an order of ring chain and a chevron  
moulded hood. Interior. Late C12 5 bay nave arcades with  
circular piers, square abaci with nicked out corners, carved  
capitals with unusual mixture of stiff leaf, interlace and  
animals, double chamfered arches, hood moulds, one with chevron  
moulding. c.1200 western crossing arch with paired shafted  
reveals, scalloped capitals and 2 pointed orders of chevron  
moulding. At the east end of the south aisle a C14 cusped niche.  
Transept arches at east ends of aisles are double chamfered on  
circular corbels. The other 3 crossing arches match the western  
one, but are plain double chamfers. One trefoil headed niche and  
ogee canopy on south side. North transept has shafted reveals to  
clerestory rear arches. Wide double chamfered arch to former  
transept chapel, now vestry, on east side. South transept has  
matching double chamfered arch. Chancel largely rebuilt in C19,  
reusing C13 windows, has double piscina and tomb recess and on  
the north side a double chamfered arch with one shafted reveal.

Fittings. Chancel walls freely tiled in C19, elaborate mosaic and tiled reredos. C19 octagonal ashlar font, carved side panels, clustered marble shafts to base. Monuments in south transept. 3 C14 effigies to a lady, a civilian and a priest with chalice. All recumbent, carved in low relief, with black letter inscriptions. In south aisle a limestone wall slab, eared and shouldered egg and dart surround to inscription panel to Beaumont Leeson d.1750.

### GLEBE COTTAGE: -

It is understood that Glebe Cottage and The Cottage are approximately 400 years old. The properties at one time in the near past was one dwelling and was converted into 2 and the side porch was added along the drive side for the new front entrance. It is also around this time the double garage was built to the rear of the property. Glebe Cottage was further extended at the rear of the property with a 2 storey extension that was originally intended for a lounge and bedroom above. In the last few years a conservatory was added to this building.

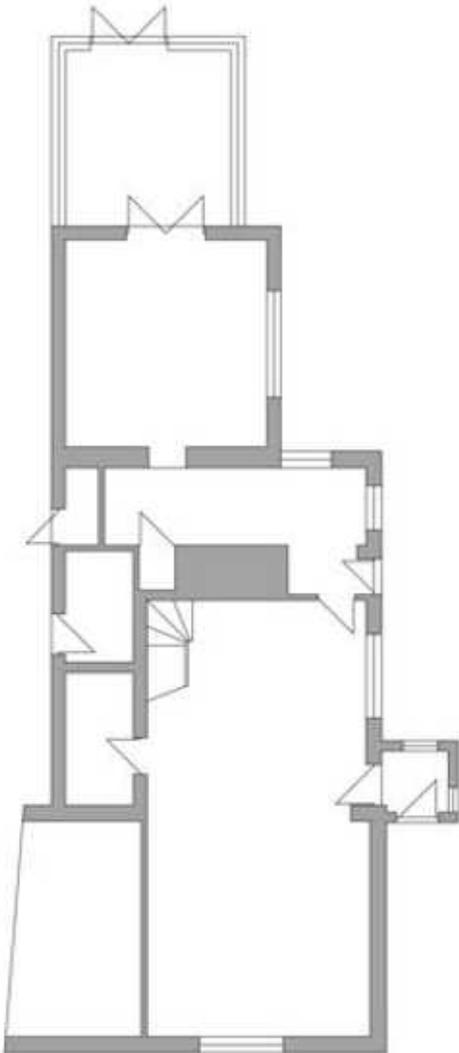

The property at present externally is a mis-match of different bricks, both type and sizes. We have the original bricks at the front which the present clients had cleaned and repointed. The porch is in 2 types of London bricks, the side has 3 different brick types especially around the rear entrance, the 2 storey extension is in London brick, the conservatory a different brick again and the garage also another type of brick.

All pitched roofs are clay pantiles. Dormers are a mixture of more modern flat roof types and the older pitched roofs, dormer claddings are a mixture of different materials and colours. Windows are brown upvc and doors white upvc. See following pictures: -

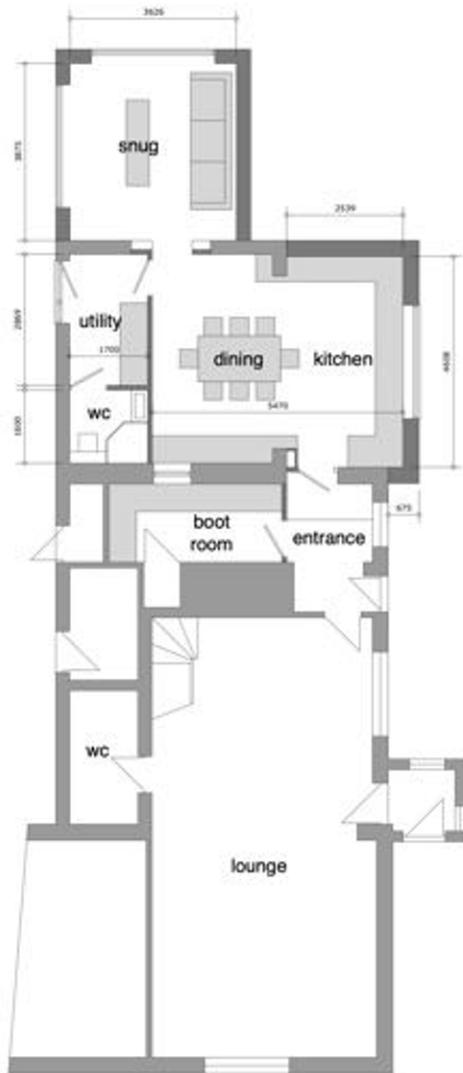

PROPOSAL: -

Existing plan

Proposed plan

The proposals are for a small kitchen extension to aid better internal flow for the property. At present the proposed boot room and entrance are part of the kitchen and it runs round into the new kitchen area which also serves as a dining area. By introducing the extension a new doorway from the new entrance area into the kitchen can be created thus making a boot room from the former kitchen (or office or pantry). This allows for a new utility and shower room that benefits with direct access to the rear garden, then the existing conservatory transforms into a snug. The conservatory transforms into a solid structure to be a more useful area and not to be too hot in the summer or unusable in the winter.

The externals address a few issues to the side and rear of the property as well as the extension itself. As already mentioned there are various different bricks used in the building in particular to the side of the property around the rear entrance. The proposal is to provide a smooth cream render to these walls including the porch and conservatory. This will leave visible 2 types of bricks, the original property bricks to the front and gable wall and the London bricks to the modern 2 storey extension at the rear. The new extension then gets clad in a vertical oak timber or a good grade fake alternative. Please see the full set of drawings for all the elevations and 3D views.

Please find attached a couple more photos showing a view of the church from the side drive and existing patio.

**CONCLUSION: -**

The proposal is to address issues to the cottage as well as the extension itself. The proposed render will unify a good portion of the property and pull it together and allow the brickwork to the oldest part of the property at the front to stand out and not be lost within a myriad of other brick types. The decision not to use yet another brick type on the extension allows us to break up the new render and use the softer vertical oak boards (or fake) that reflect a lot of the greenery and trees to this side of the property.

We see this as a positive contribution to Glebe Cottage itself and not detrimental to its setting adjacent to the Church of St. Mary's.

Regards

Julian Warrick
